

Mid term Exam for Financial Econometrics with Python

PRAT Paul; GAVINI Charles; FOURNIER Justin; BLANC Mathieu

November 8, 2024

Contents

1	Introduction	1
2	Preliminary	1
2.1	AMAZON	1
2.2	Data Table	1
2.3	Checking the 25 year range condition	1
2.4	Prices evolutions	2
2.5	Calculating returns	2
2.6	Squared returns	3
A	Appendix: Python Code	3

1 Introduction

For the midterm assignment, we composed a group of 4 with Gavini Charles; Fournier Justin; Prat Paul and Blanc Mathieu. This document contains all the results of our assignment, including tables, figures, and calculations. It is composed by 1 parts, first, importing the good python libraries, then initialising variables to separate the differents datas (daily, monthly, ..., returns, logreturns,...)

2 Preliminary

2.1 AMAZON

The choosen stock is Amazon, because it is higly related in the current actuality, and we are intrested by such a major company that Amazon has become with time The ticker from yahoo finance is "AMZN" on the Nasdaq stock exchange [AMAZON on Yahoo Finance](#) First, importing the Amazon stock with yfinance, then display the pandas table

2.2 Data Table

The data printed here, is the preview of the Amazon stock extraction from yahoo fiannce:

	Open	High	Low	Close	Adj Close	Volume
Date						
1999-01-21	2.612500	2.759375	2.314063	2.650000	2.650000	940964000
1999-01-22	2.487500	3.146875	2.468750	3.075000	3.075000	875316000
1999-01-25	3.037500	3.084375	2.750000	2.809375	2.809375	546476000
1999-01-26	2.815625	3.031250	2.765625	2.877344	2.877344	490696000
1999-01-27	3.353125	3.493750	3.000000	3.140625	3.140625	700452000

Table 1: Preview of Amazon Stock Data from Yahoo Finance

2.3 Checking the 25 year range condition

We have to check that the data is correctly displayed over a 25years range, hopefully, the introduction from Amazon is from january 1999, so it we should be able to find a 25 year range of data of the Amazon stock. To check that we can compute a python code to count the gaps and visualize the dates of gaps in order to see for any huge gap that would be problematic for analyzing data.

Figure 1: Missing Dates in Full Date Range (2010 to 2011)

2.4 Prices evolutions

Then, plotting the prices evolution:

Figure 2: Prices over time by frequency

2.5 Calculating returns

Figure 3: Prices, returns and log returns

2.6 Squared returns

Figure 4: Squared daily returns and daily log returns

A Appendix: Python Code

Below is the Python code used in this analysis.

```
1  # Python code example
2  import numpy as np
3  import pandas as pd
4
5  def analyze_data(data):
6      mean = np.mean(data)
7      std_dev = np.std(data)
8      return mean, std_dev
9
10 data = [1, 2, 3, 4, 5]
11 mean, std_dev = analyze_data(data)
12 print(f"Mean: {mean}, Standard Deviation: {std_dev}")
```
